

## THE NEXT LEVEL OF REMOTE SENSOR MANAGEMENT

As part of our new software platform Xovis IBEX, Xovis Device Control takes sensor management to the next level. System integrators in the retail and other industries can assign the deployed Xovis 3D sensors to specific categories and integrate this new remote sensor management solution into an existing software environment via API.

- Organize sensors in different categories
- Update sensors simultaneously
- Filter and search through all devices
- Get detailed information and the background image of each Xovis 3D sensor
- Integrate into your software environment using the full-featured API

Get in touch with us for more information on Xovis Device Control and our broad portfolio of Xovis 3D sensors and software solutions. [info@xovis.com](mailto:info@xovis.com)
